Limited Warranty	24

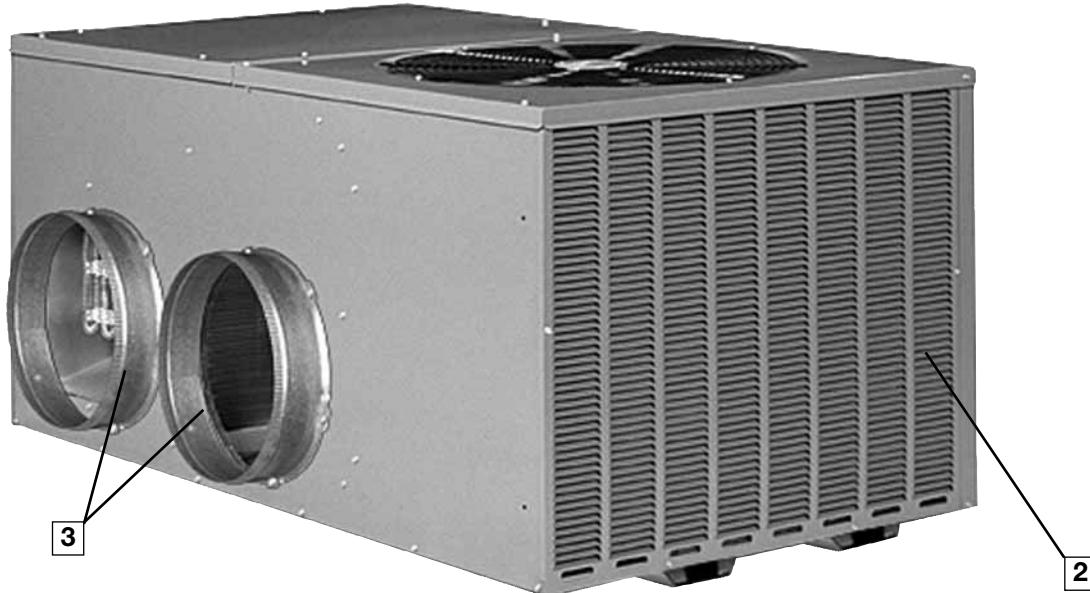

The RSPM of Package Air Conditioners are designed to be the most efficient, quickest to install, easiest to service, and most reliable units in the industry - while still maintaining an affordable price. This platform provides you with a full line of nominal capacities from 2 through 5 tons utilizing earth-friendly R-410A refrigerant. This unit is suitable for use in mobile homes, manufactured housing and conventionally constructed residential and commercial buildings where horizontally-ducted systems are preferred. RSPM Models are 14 SEER and AHRI-certified.

As with all units offered by Fujitsu, we started our design process with input from the customer. From fan grille to the base rails, Fujitsu has combined 30 years worth of package unit design experience with input from Dealers to meet the latest application requirements.

Starting at the bottom, the base rails (1) allow for separation between the unit base and the ground level, protecting the base from ground moisture and providing air circulation around the unit. Constructed from sturdy 14-gauge G-90 sheet metal, the base rails also allow for easier maneuverability during installation.

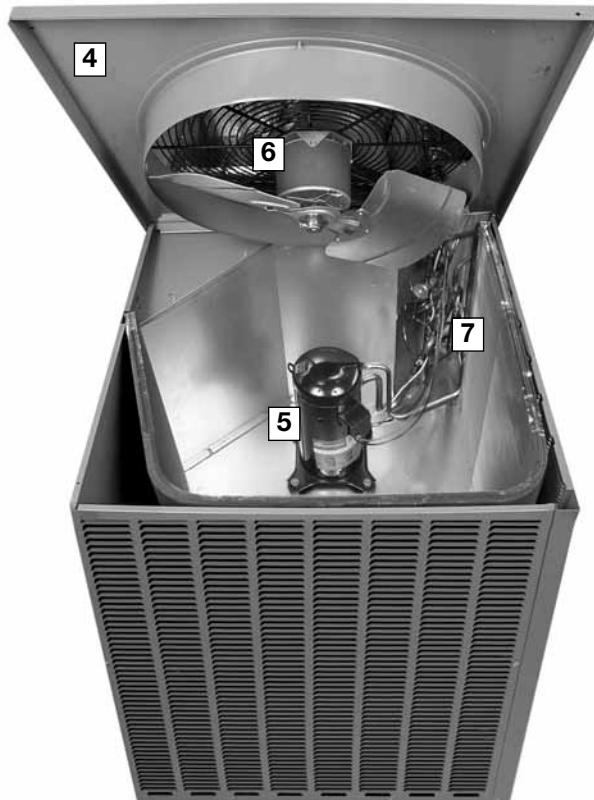

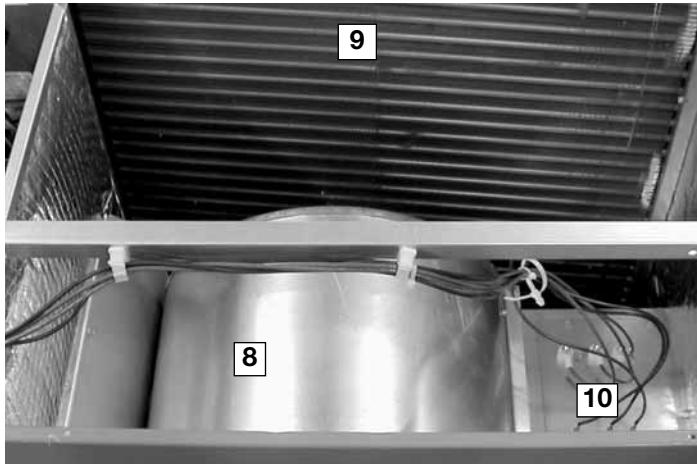

To provide flexibility in space-limited installations, the unit can be installed flush to the structure without blocking airflow over the outdoor coil or making any screws inaccessible for maintenance. Furthermore, the cabinet is a slim 33" wide. Full-louver coil protection (**2**) makes Fujitsu unique in the industry and also totally protects the outdoor coil from vandalism and weather extremes.

Two round 14" duct collar (**3**) are included with the unit, which makes attaching duct a snap. The collar is crimped around the leading edge, making it easier to install duct onto the collar. A metal bead around the circumference prevents the attached ducting from sliding off after installation.

Keeping service technicians in mind, Fujitsu takes pride providing easy access to internal components. The outdoor-section top cover (**4**) is easily removed to allow access to the scroll compressor (**5**), outdoor fan motor (**6**), and refrigerant tubing (**7**).

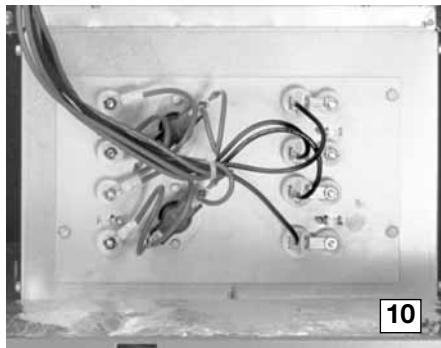

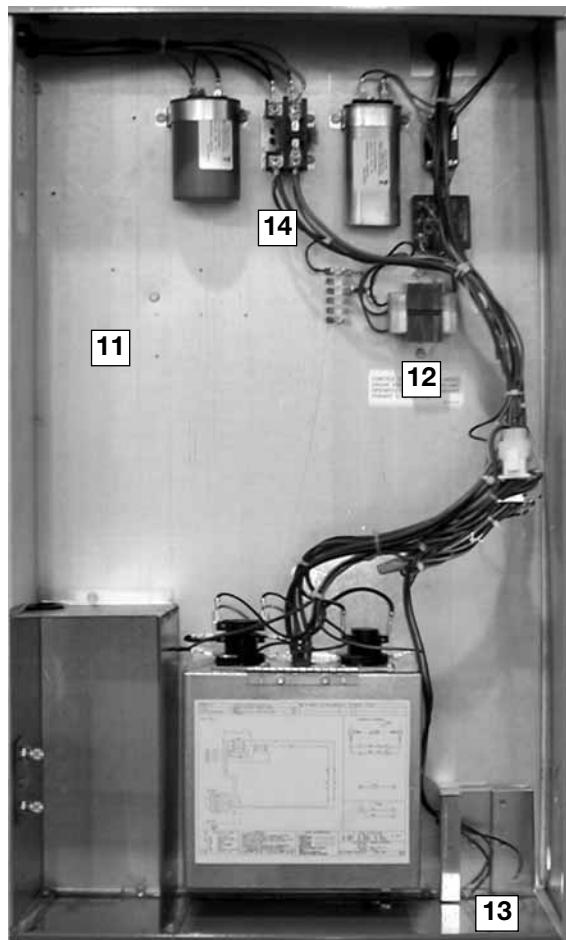

The indoor-section top cover also easily opens to access the removable blower housing and motor (**8**). This also gains total access to the indoor coil for cleaning and service (**9**).

The indoor motor and blower system will achieve nominal 400 CFM per ton up to a minimum of .8 inches of static pressure, which helps to eliminate customer dissatisfaction over poor airflow brought about by high-static duct designs.

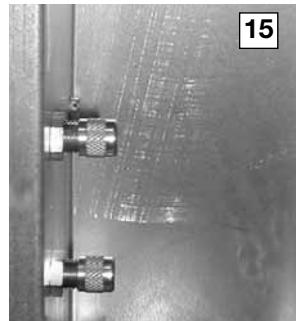

Optional electric heat (**10**) can be specified as factory installed, or can be easily installed in the field, with either dual- or single-point power connections.

The controls are located in a large, easy-to-access control box (**11**), which provides plenty of space in which to troubleshoot. The transformer (**12**) is protected by an in-line fuse, which protects the transformer during a low-voltage electrical short. The low-voltage (**13**) and high-voltage (**14**) wiring connections are easily accessed and have ample room around which to maneuver. Troubleshooting is further aided with number- and color-coded wiring, which corresponds with the large, easy-to-read wiring diagram located on the inside of the control box access panel.

High and low refrigerant pressure can easily and accurately be measured using the two gauge ports (**[15]**) located inside the control box.

Foil-faced insulation is securely glued and captured to the cabinet. On the base of the unit, closed-cell insulation is used to prevent moisture from being absorbed and help reduce mold content to provide better indoor air quality.

For reliability and long-lasting operation, Fujitsu uses 100% scroll compressor technology (**[18]**) on all package platforms. With over 12 years of history, the scroll compressor has proven to be reliable, efficient, and quiet during operation.

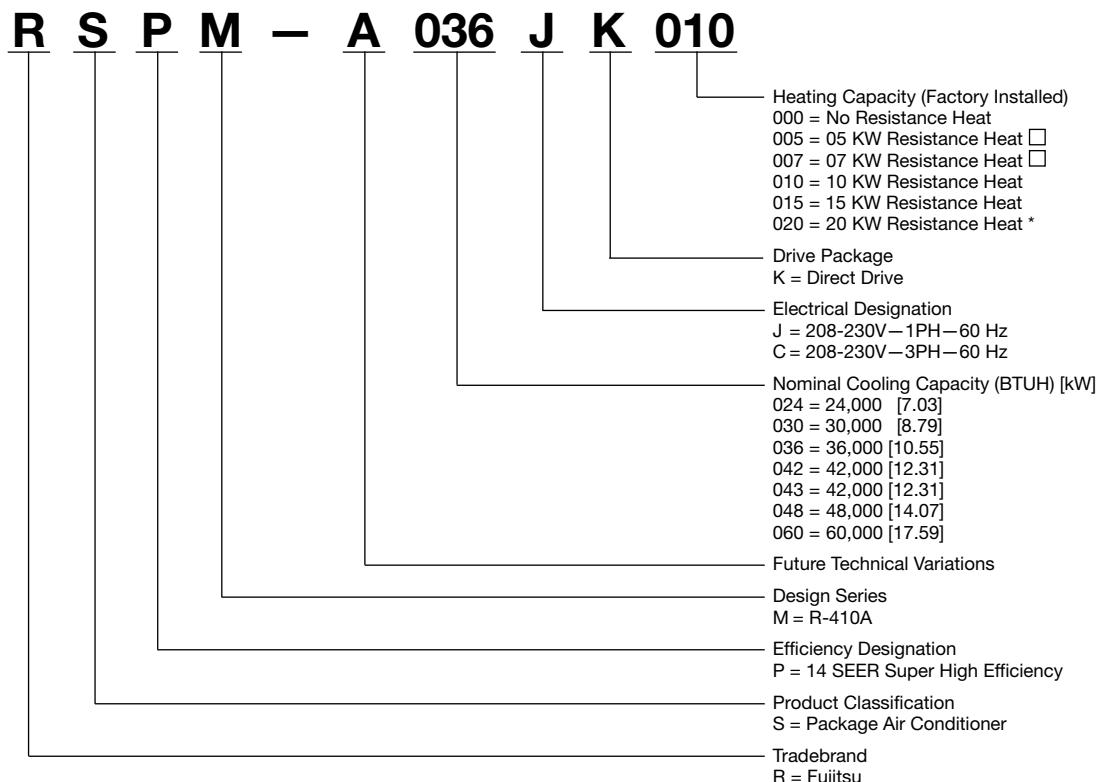

A small side panel grants access to a removable, sloped drain pan (**[16]**), which helps to ensure indoor air quality (IAQ) throughout the life of the unit.

A 3/4" drain trap (**[17]**) assembly is provided for convenience.

"Patent 7,430,877"

Not available in 3 phase models.

*Available in 3¹/₂, 4 and 5 ton models.

NOTES:

1. Cooling Performance is rated at 95° F ambient, 80° F entering dry bulb, 67° F entering wet bulb. Gross capacity does not include the effect of fan motor heat. AHRI capacity is net and includes the effect of fan motor heat. Units are suitable for operation to ±20% of nominal cfm. Units are certified in accordance with the Unitary Air Conditioner Equipment certification program, which is based on AHRI Standard 210/240 or 360.
2. EER and/or SEER are rated at AHRI conditions and in accordance with DOE test procedures.
3. Outdoor Sound Rating shown is tested in accordance with AHRI Standard 270.
4. Standard 3/4" PVC P-Trap provided.

DR — Depression ratio
dB_E — Entering air dry bulb
wbE — Entering air wet bulb

Total — Total capacity x 1000 BTUH
Sens — Sensible capacity x 1000 BTUH
Power — KW input

NOTES: ① When the entering air dry bulb is other than 80°F [27°C], adjust the sensible capacity from the table by adding [1.10 x CFM x (1 - DR) x (dB_E - 80)].

DR —Depression ratio
dB E —Entering air dry bulb
wbE —Entering air wet bulb

Total —Total capacity x 1000 BTUH
Sens —Sensible capacity x 1000 BTUH
Power —KW input

NOTES: ① When the entering air dry bulb is other than 80°F [27°C], adjust the sensible capacity from the table by adding [1.10 x CFM x (1 - DR) x (dB E - 80)].

BEFORE PURCHASING THIS APPLIANCE, READ IMPORTANT ENERGY COST AND EFFICIENCY INFORMATION AVAILABLE FROM YOUR RETAILER.

GENERAL TERMS OF LIMITED WARRANTY*

Fujitsu General America, Inc. will furnish a replacement for any part of this product which fails in normal use and service within the applicable periods stated, in accordance with the terms of the limited warranty.

*For complete details of the Limited Warranties, including applicable terms and conditions, contact your local contractor or the Manufacturer for a copy of the product warranty certificate.

Conditional Parts (Registration Required)

1 Phase, Residential Applications.....Ten (10) Years

Compressor

1 Phase, Residential Applications.....Ten (10) Years

1 & 3 Phase, Commercial Applications.....Five (5) Years

Parts

3 Phase, Commercial Applications.....One (1) Year

**Before proceeding with installation, refer
to installation instructions packaged
with each model, as well as complying
with all Federal, State, Provincial, and
Local codes, regulations, and practices.**

"In keeping with its policy of continuous progress and product improvement, the right is reserved to make changes without notice."
